EXPERIENCES

Brechbuhler Scales (Systems Group)

Software Developer Intern

June 2018 - Present

- Introduced a new way to improve data storage using Azure that decreased submission times from several minutes to a fraction of a second.
- Led and managed the intern group in the development of a Xamarin .NET application from conception to completion that is now published to the Google Play Store (Summer 2019)
- Responsible for connecting the visual elements from 3 mobile applications to the backend using MVVM
- Maintaining direct communication with customers through live demonstrations and training.
- Completing all deployments to the Apple Store and Google Play Store and ensuring that all software builds and functions properly.
- Interacting in a team environment using Git, GitHub, and a Kanban

Maven Developers, LLC

Co-Founder and Software Developer

July 2018 - Present

- Created a Xamarin .NET application that talks to multiple APIs to send and retrieve data
- Collaborated with a team of developers to create three Android apps for an Exercise Science professor at the University of Mount Union on time and on budget
- Professionally consulted with clients to gather and understand functional and technical application requirements

University of Mount Union Helpdesk

Information Technology Consultant

May 2016 - May 2018

- Helped students with general computer repairs, support on the phone, and special projects in collaboration with IT staff members
